U.S. DEPARTMENT OF COMMERCE, Malcolm Baldrige, Secretary
NATIONAL BUREAU OF STANDARDS, Ernest Ambler, Director

INTRODUCTION

The Department of Commerce encourages and supports participation of its staff in standards committee activities relating to the mission of the Department. This policy is put forth in Department Administrative Order (DAO) 216-14 "Department of Commerce Participation in the Development and Use of Voluntary Standards.¹/ Department staff participate in standards development activities of U.S. private sector standardization bodies; local, State, and Federal governments; industry; and international private and treaty organizations to develop needed standards in such areas of national concern as energy conservation, public health and safety, and productivity enhancement.

Through a computerized data system, the Standards Assistance and Management Information (SAMI) project in the Office of Product Standards Policy of the National Bureau of Standards collects and disseminates information on all DoC staff participation in outside standards-writing activities. For several years it has published directories of NBS staff participation on outside standards committees. This is the first directory compiled to incorporate Department-wide participation. The information was obtained through the Departmental Committee on Standards policy.²/ Agency representative were provided with copies of NBS Form 83a and asked to have them completed for their agencies.

¹/DAO 216-14 was published to implement OMB Circular A-119 "Federal Participation in the Development and Use of Voluntary Standards.

²/The Departmental Committee on Standards Policy was established in DAO 216-14 and consists of representatives from agencies within the Department for the purpose of advising the Secretary and the Director of the Office of Product Standards Policy on the implementation of OMB Circular A-119 (see footnote 1).

This directory contains printouts from that system in three categories: Index of DoC Staff Committee Participants, Index of Committee Sponsors, and an Index of Standards Activities by Departmental Agency. A broad definition of "Standards Activities" was used in the preparation of this directory. Each index is listed alphabetically. A list of acronyms and an organizational chart of the Department follows at the end. User comments are solicited.

The information contained in this directory is current as of December 31, 1984. For more current information, or if you have any questions regarding committee participation, contact the SAMI office, Room A625, Administration Building, National Bureau of Standards, Gaithersburg, MD 20899, (301) 921-3287.

The SAMI office solicits information concerning participation by Department employees in standards activities which are not covered in this directory. Copies of NBS Form 83a are available from the NBS SAMI Office. Information supplied will be incorporated in the next edition of this Directory.
